

To retrieve a file from the 7200 to a PC:

On the 7200:

- Exit the ITScriptNet client to a DOS prompt
- Change directories by typing CD itbatch and press enter

On your PC:

- Load Hyper Terminal
- Select Transfer
- Select Receive File
- Set a directory to receive the files into
- Select Ymodem as the transfer protocol
- Click Receive to start the PC side of the process

On the 7200:

- Type YFF progname.itb (where progname is the name of the data collection program.
- If you do not know the name of your .itb file, you can send the entire contents of the directory by typeing YFF *.*.

The files will be transferred to the PC and stored in the directory you specified.
